Juschwneschtrans Personnel

4. Mishin, former Soviet director of Juschwneschtrans who reportedly left Vienna in early May 1950, has returned to take charge of the Juschwneschtrans office during the illness of Kruglyov, the present director.(5)

(1) [] Comment: [] rumors [] that the Soviets plan to consolidate Juschwneschtrans and the DDSG.

(2) [] Comment: Most of these parts consisted of large beams which were probably removed from war-damaged sheds which the Soviets are now dismantling. Some of these beams were 15 meters long and required special railcars for shipment.

(3) [] Comment: Deckfarbe is a heavy paint similar to the type of red lead paint which is used by the U.S. Navy.

(4) [] Comment: These construction parts were similar to those described in [] Comment 2. It is likely that they were salvaged from some of the German factories in the Wiener Neudorf area which were demolished during the war.

(5) [] Comment: [] Mishin had been relieved of his position as Soviet director of Juschwneschtrans.
